

Experienced Android and iOS Developer

Description

Boson is a Silicon Valley based startup focusing on farm automation. We are working on solving farming/agriculture automation challenges with our electric vehicles and computer vision

We are looking for a skilled and experienced Android & iOS Developer to join our team. The ideal candidate will have 3 to 4 years of experience in mobile app development, with expertise in building high-performance, user-friendly applications for both Android and iOS platforms. You will collaborate with designers, product managers, and backend developers to create seamless and intuitive mobile experiences.

Responsibilities

- Design, develop, and maintain mobile applications for Android and iOS.
- Collaborate with UI/UX designers to implement engaging and responsive mobile interfaces.
- Integrate applications with RESTful APIs and cloud services.
- Ensure application performance, quality, and responsiveness across different devices.
- Write clean, maintainable, and scalable code following industry best practices.
- Troubleshoot and debug application issues and improve performance.
- Stay updated with the latest trends and technologies in mobile development.

Qualifications

- 3 to 4 years of experience in Android (Kotlin/Java) and iOS (Swift/Objective-C) development.
- Experience with cross-platform frameworks like Flutter or React Native is a plus.
- Strong knowledge of Android SDK, iOS SDK, and mobile development lifecycle.
- Proficiency in working with RESTful APIs, JSON, and third-party libraries.
- Understanding of UI/UX principles and mobile app design best practices.
- Experience with Firebase, AWS, or other cloud-based services.
- Knowledge of mobile security best practices.
- Familiarity with Git/GitHub/GitLab for version control.
- Experience in app deployment on Google Play Store and Apple App Store.

Preferred Qualifications:

- Experience with CI/CD pipelines for mobile app deployment.
- Knowledge of Bluetooth, WebSockets, and real-time data processing in mobile apps.
- Familiarity with testing frameworks like Espresso, XCTest, or Appium.
- Exposure to MVVM, Clean Architecture, or other design patterns.
